I have had psychic ability since childhood, sensing the spirit world, clairsentiently, clairaudiently, and clairvoyantly. An affinity with nature, and communicating with animals led me to receive my BA in Environmental Studies at Rollins College and I spent the next 20+ years working in the environmental field as a wetland biologist, environmental consultant, manager, psychic medium and Artist. During these years I studied the religion of Spiritualism, practiced my mediumship, studied: metaphysics, past life regression, astral travel, paranormal subjects, animal communication, healing and spirituality and was led to attend numerous workshops and classes at the Cassadaga Camp Meeting Association in Cassadaga, Florida.

I have been a psychic medium for over 20 years and have completed several intensive courses in Mediumship and Healing at the famed College of Psychic Studies, Arthur Findlay College in Stansted, Mountfitchett UK and have completed several other mediumship, psychic art and trance healing training workshops both in the USA and UK.

I have been fortunate enough to have been tutored by several of the most renowned and well respected UK Mediums and Healers.

As a practicing Spiritual Medium and Healer, I am able to be of service to those who wish to have communication with those who have passed on, to provide evidential information from deceased loved ones and hopefully provide comfort. I talk to those who have crossed over, as well as my spirit guides and those of my clients to give the messages they wish to relay through clairvoyance, clairaudience and clairsentience. As a Spiritual Healer and Energy Therapist I am able to direct healing energies and receive information from Spirit for my clients. On a psychic level, I can possibly relate information regarding aura, physical condition, life situations, job, spiritual assessments, relationships, family, finances, and future trends.
